Executive Summary

This plan is the Public Transit-Human Services Transportation Plan for Hancock County, Ohio. This plan was initially developed in 2007 and updated in 2013, 2015 and 2017 and updated annually thereafter until rewritten in 2021. This plan fulfills the requirements of the Federal Transit Administration (FTA) under the Infrastructure Investment and Jobs Act. According to requirements of the Infrastructure Investment and Jobs Act, locally developed coordinated public transit-human services transportation plans must be updated to reflect the changes established by the Infrastructure Investment and Jobs Act legislation.

Transportation is a critical component in the quality of life of the communities in Hancock County. Transportation provides access to jobs, education, health care, human services and allows all community members, including older adults and people with disabilities, to live independently and engage in community life. It is the purpose of this plan for local stakeholders to work collaboratively to do the following activities:

1. Identify all community resources
 - o Current primary and secondary transportation providers.
 - o Primary stakeholders and decision-makers involved in transportation systems, including human service personnel, government officials and other community leaders who can help steer Hancock County toward impactful change.
 - o Available transportation equipment (Vehicle Inventory), including wheelchair-accessible vehicles.
 - o Available transportation training programs.
 - o Transportation-related technology currently in use.
 - o Current transportation expenses, revenues and funding sources.
 - o Served and underserved populations with an emphasis on Hancock County's transportation gaps and needs.
 - o Demographic and geographic characteristics of the population being served.
2. Identify and Prioritize community transportation needs

The following are Hancock County's top transportation needs and priorities as identified by the Hancock County Transportation Coalition.

Top tier priorities

- o Improve availability of transportation services for second- and third-shift workers; Workplace support for employees who need transportation options.
- o Transportation needs of underserved population (50 to 59-year-olds who do not qualify for other programs) especially access to healthcare and other social services.
- o Create greater awareness of transportation options for the public, elected officials and media.

- o Continue and improve outreach to senior living facilities on available transportation options.
- o Coordination of transportation between agencies.
- o Coordination for inter-county transportation; Continued support for out-of-county transportation options (Columbus, Cleveland, Toledo, etc.).
- o Sustain and expand services, by adding/replacing maintaining vehicles, hiring and/or retaining drivers and adding technological upgrades for current transportation providers.
- o Lack of fixed-route transportation.

Second tier priorities

- o More active transportation options and infrastructure (Coordinated with providers, bike racks on vehicles).
- o More outreach/service to outlying areas of the county.
- o Continued and improved cooperation and communication among stakeholders.
- o Additional funding local (public, private) for transportation providers to increase state and federal matching funds.
- o Car maintenance programs for people with low incomes.

Third tier priorities

- o Weekend Saturday evening/Sunday transportation.
- o Additional affordable on-demand transportation & education and outreach options (ride share, vanpools, etc.).
- o Lack of centralized location to access information on available community transportation options (website/call center).
- o Bus shelters for key pick up locations around the county.
- o Transportation aides for elderly and disabled.
- o Continued improvement/coordination/expansion of mobility management program.

3. Establish a clear plan for achieving shared goals

The Hancock County Transportation Coalition in cooperation with transportation providers, human service agencies and the county's mobility manager will work together toward alleviating the unmet transportation needs listed in the coordinated plan, using it as a roadmap for future action.

Primary transportation goals for the county to achieve include:

- o Study the expansion of service hours
- o Complete and implement county active transportation plan.
- o Expanded options for transportation to adjoining counties.
- o Increase knowledge and understanding of local transportation options among the public, stakeholders, public officials and media.
- o Seek to provide additional funding options to support current service from transportation providers and expand service for seniors, disabled and other disadvantaged residents.
- o Continue cooperation among stakeholders to find ways to improve transportation services and options to all Hancock County residents.

Fundamental to the Coordinated Transportation Plan process is the active and meaningful involvement of stakeholders. For projects selected for funding under the Section 5310 program, participation in planning activities must include participation and/or representation of the following, at minimum:

- Seniors;
- Individuals with disabilities;
- People with low incomes;
- Public, private and non-profit transportation providers;
- Human services providers;
- The general public, and;
- Local public officials.

In order to ensure participation from the above groups the following stakeholder involvement activities were performed:

- o Surveys were conducted targeting separate groups each with an interest and stake in improving transportation in the county. Surveys targeting senior citizens, the county's general population, the county's employers and Hancock County's human service and transportation providers were conducted. A total of 280 surveys were returned.
- o Meetings of the Hancock County Transportation Coalition were conducted quarterly between 2017-2020. With monthly meetings held in 2021.
- o Interviews were conducted with key transportation stakeholders in the region.
- o Focus groups were held at senior living facilities, homeless shelters and other human service providers across the county.
- o A public meeting was held at 50 North to discuss the plan and any unmet needs or transportation gaps in the county.

This plan was developed and adopted by the Hancock County Transportation Coalition. More information about the coalition can be found in Appendix A.

I. Geographic Area

Hancock County, is located in the heart of northwest Ohio. The county has a total area of 534 square miles, of which 531 square miles is land. Hancock County is bordered by Wood County to the north, Seneca County to the northeast, Wyandot County to the southeast, Hardin County to the south, Allen County in the southwest and Putnam County to the west. Hancock County also shares a border with Henry County in its northwest corner. Findlay serves as an employment, retail and medical care hub for other counties in the region.

Map 1: Basic map of the geographic area covered by the plan

Map 2: Major trip generators in the geographic area

Hancock County has 10 employers with nearly 500 or more employees that generate a substantial number of trips per year from both inside and outside of the county. Below is a map with the major trip generators in the county as well as a graph featuring the county's largest employers.

Hancock County Major Trip Generators

- A Marathon Petroleum
- B Blanchard Valley Health System
- C Cooper Tire & Rubber
- D Hearthside Foods
- E Whirlpool Corporation
- F Findlay City Schools
- G Kohl's Distribution
- H Lowe's Distribution
- I Nissin Brake Ohio
- J Sanoh America
- K University of Findlay
- L McLane Company
- M Campbell Soup/DHL

Hancock County's Largest Employers	
Company	Number Employed
Blanchard Valley Health Center	2,600
Whirlpool Corporation	2,400
Marathon Petroleum	2,200
Hearthside Foods	1,900
Cooper Tire & Rubber	1,800
Findlay City Schools	832
Lowe's Distribution	653
University of Findlay	579
Nissin Brake Ohio	536
Hancock County	527

II. Population Demographics

Population demographics of the planning area are considered when developing coordinated transportation priorities because they help planners to understand potential demand for transportation, as well as need. The following charts outline the demographic and Limited English Proficiency (LEP) characteristics of Hancock County.

The current population of the Hancock County is slightly more than 75,000 people. The population is expected to peak at around 75,600 in 2025 and is expected to decline to 73,290 by 2050.

Chart 1: Total Population Current and Projected for Five Years

Chart 2: Total Population by Age Group

Approximately 18 percent of Hancock County's population is age 65 or older. Another 20 percent of the population are between the ages of 50 and 64. The rest of the age cohorts in 10-year groupings from age 49 and younger all make up between 12 and 14 percent of the population each. Studies show as a population ages, demand for transportation in a community is likely to increase.

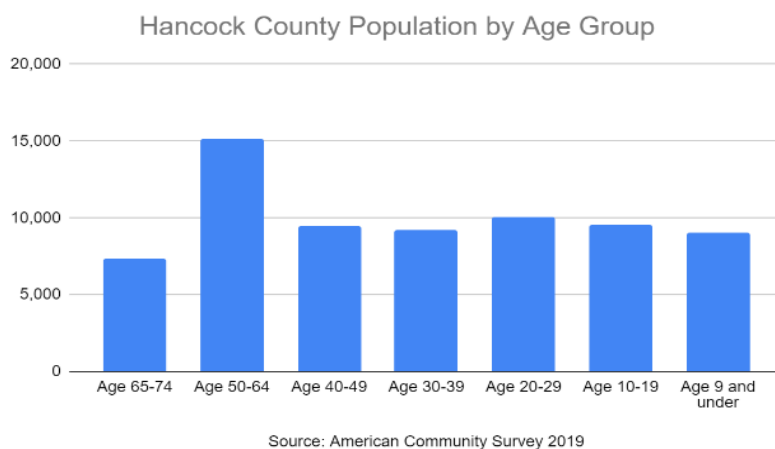

Chart 3: Total Population by Race

Approximately 89 percent of Hancock County's population are White individuals. Individuals self-identifying as Hispanic or Latino make up 5.6 percent of the population. A total of 1.9 percent of county residents are Asian and another 1.9 percent self-identified as other in the latest figures provided by the U.S. Census Bureau and Ohio Department of Development in 2019. Approximately 1.7 percent of Hancock County's population is African American.

**Chart 4: Number and percentage of people with disabilities**

There were 8,721 persons with a disability in Hancock County, according to the U.S. Census Bureau's 2019 American Community Survey. That equates to approximately 11.5 percent of the county's population. A total of 43.8 percent of the population age 75 and older are disabled with another 21.8 percent of those between the ages of 65-74 having some sort of disability.

Chart 5: Number and percentage of households with incomes below the federal poverty level

In Hancock County, approximately 13 percent, or a total of 4,175 households have incomes below the federal poverty guidelines.

County	Total Households	Households below poverty	Percent of Households below poverty
Hancock County	32,397	4,175	13.07%
Wyandot County	9,076	1,338	14.74%
Seneca County	21,652	3,321	15.34%
Hardin County	11,495	2,020	17.57%

Source: Ohio Office of Research Ohio County Profiles 2020

Chart 6: Number and percentage of individuals with incomes below the federal poverty level

Approximately 8,500 persons or 11.28 percent of Hancock County's population have incomes below the federal poverty guidelines.

County	Total Population	Population Below Poverty	Percent of Population Below poverty
Hancock County	75,783	8,545	11.28%
Wyandot County	21,772	2,068	9.50%
Seneca County	55,178	7,680	13.92%
Hardin County	31,365	4,880	15.56%

Ohio Office of Research Ohio County Profiles 2020

Chart 7: Percent of population that speak English "Less than very well"

Of the Hancock County's population over the age of 5, approximately 441 people have limited English proficiency. That's 0.62 percent of the county's population.

County	Population 5 And Older	Individuals With Limited English Proficiency	Percent of Population With Limited English Proficiency
Hancock County	71,088	441	0.62%
Wyandot County	20,896	228	1.09%
Seneca County	52,604	179	0.34%
Hardin County	29,591	121	0.41%

U.S. Census Bureau American Community Survey, 2019

III. Assessment of Available Services

Conducting an evaluation of service provider capabilities and analyzing the existing gaps and duplications of services for transportation resources in each community, provides transportation planners with information needed to implement changes that will improve the network of transportation resources and services in Hancock County and across county lines.

The lead agency identified stakeholders to participate in the assessment of available services. These stakeholders included those who were represented in the current or past planning committees, as well as others who the planning committee identified as being appropriate stakeholders.

Interviews and/or surveys to gather information were conducted with each of the identified stakeholders.

The purpose of interviews was to offer the stakeholders an opportunity to discuss the specific transportation services, gaps, needs, and priorities for their respective service areas or communities.

When applicable, information reported in the previous coordinated plan was used to supplement information gathered during this planning effort.

Inventory of Transportation Providers

The following information is based on tabulations from the survey and interview results. A total of 22 provider organizations provided information about their services.

INTRODUCTION

Evaluation of service provider capabilities and analysis of the existing gaps and duplications that exist in the structure of transportation resources in Hancock County provides coordinated transportation planners with the necessary foundation for implementing changes that will complete and improve the network of transportation resources for the county's citizens. Different community outreach activities were utilized to encourage public and human service agency transportation providers to participate in the coordination planning efforts.

Stakeholders were invited to a county-specific public meeting to discuss community unmet needs and opportunities and were also encouraged to participate in Coordinated Public Transit-Human Services Transportation Provider and Human Service Agency Surveys. The surveys were designed for transportation providers, government and non-profit organizations and funders. Survey questions were intended to collect information on unmet transportation needs and available service. The survey was implemented as a web-based application and hosted by each county lead designated agencies. A list of organizations that completed a survey, attended a transportation coalition meeting and/or attended the stakeholder public meetings is included below:

- o HHWP Community Action Commission (includes HATS Transportation program)
- o Clymer Medical Transport, Inc.
- o Good Samaritan Society - Arlington
- o Hancock County Board of Developmental Disabilities/Blanchard Valley Center
- o KanDu Group
- o The American Cancer Society
- o Comfort Keepers
- o Fox Run Manor
- o Hope House for the Homeless

- o Area Agency on Aging 3
- o 50 North
- o City Mission
- o United Way of Hancock County
- o Kiwanis Village
- o Blanchard House
- o A Renewed Mind
- o Keeping Kids Safe, Inc.
- o Focus Wellness and Recovery Community
- o Hancock County Job & Family Services
- o Family Resource Center
- o Cancer Patient Services
- o Hancock County Veterans Services
- o Children's Mentoring Connection
- o K&P Medical Transportation

HATS Transportation - a program of the HHWP Community Action Commission

Hancock Area Transportation Service (HATS) is a program of the Hancock Hardin Wyandot Putnam Community Action Commission (HHWP CAC) and is a Section 5311 rural public transportation system. HHWP CAC is a private non-profit organization and is the designated grantee for HATS. As such, HHWP CAC is responsible for general oversight and HATS handles the day-to-day operations. HATS is the only public transportation provider for Hancock County. HATS provides low-cost, demand response, public transportation to anyone within Hancock County and for any purpose. There are no service eligibility requirements for passengers. HATS is funded in part by the Federal Transit Administration, Ohio Department of Transportation, the United Way of Hancock County, contracts, local contributions, fares, and community donations.

HATS served 2,110 public transportation consumers during 2020. HATS provided 54,206 passenger trips in 2020 and the vehicles traveled 360,728 service miles. The fleet consists of 13 ADA accessible buses, 3 ADA accessible Transit vans and 2 ADA accessible minivans. HATS also has 7 non-accessible vehicles, used primarily for Findlay Family YMCA contract trips. Several new vehicles are expected to be added to the fleet before the end of 2021.

Hours of operation are Monday through Friday, 7:15 a.m. to 9:45 p.m. and Saturdays, 7:15 a.m. to 4:45 p.m. Office hours are 8 a.m. to 4:30 p.m. Monday through Friday. HATS observes all HHWP CAC's posted holidays. Upcoming holidays are posted in each vehicle and a list is available upon request.

Clymer Medical Transport, Inc.

Clymer Medical Transport is a private, for-profit organization providing medical and non-medical transportation in Allen, Auglaize, Shelby, Mercer, Van Wert, Putnam, Hancock, Hardin, Logan, Darke, Miami, and Champaign Counties. Transportation provided is door-through-door, demand response service provided on a contractual basis through the Area Agency on Aging 3, Catholic Social Services and the Care and Coordination Program as well as private pay to anyone in the community. Passengers must meet eligibility requirements before they are referred to this service. There is no eligibility requirement for private pay customers.

In 2019, Clymer Medical Transport completed over 7,000 trips. The organization provided 436 one-way trips and 6,599 round trips. The base rate for a private pay trip is \$110 plus \$3 per mile after 10 miles. There is an empty mileage fee of \$2 per mile after 10 miles outside of Lima. Area Agency on Aging 3, Catholic Social Services, and Care and Coordination Plan all have different rates per their contracts. Clymer Medical Transport operates Monday through Friday from 4 a.m. to 9 p.m. and on

Saturday – Sunday from 4 p.m. to 5 p.m. (for dialysis only). Any requests outside of these hours will need to be covered by a driver that volunteers to work those hours.

In 2019, Clymer Medical Transport had \$431,416.81 in expenses. Clymer has 12 vehicles - 9 of which are wheelchair accessible.

Good Samaritan Society - Arlington

The Evangelical Lutheran Good Samaritan Society is a private non-profit organization providing services for seniors in Hancock, Hardin, and Allen counties. It operates both a skilled nursing and senior independent living facility in Arlington.

KanDu Group

KanDu, a 501(c) 3 non-profit organization, has served the needs of adults with developmental disabilities for more than 40 years. Beginning in 1969 as Blanchard Valley Industries, the program offered habilitation, vocational, and leisure activities to residents of Hancock County. Its mission is to promote the independence, community integration and employability of adults who have a developmental disability.

With the addition of Kan Du Studio in 2007, the organization expanded focus on integrating adults with developmental disabilities into the community, first through employment, and then through volunteer and cultural activities.

It is certified by the Ohio Department of Developmental Disabilities and is accredited in Organizational Employment Services and Community Employment Services by the Commission on Accreditation of Rehabilitation Facilities (CARF). CARF International is an independent, non-profit organization that accredits health and human service agencies.

Hancock County Veterans Commission

The Hancock County Veterans Service Commission is a five-member board appointed under the provision of Title 59 of the Ohio Revised Code. Each member represents a Veteran Service Organization (AMVETS, DAV, American Legion, VFW, Korean War Vets/Military Order of Purple Heart) but also all Hancock County veterans and their families. It aids with disability compensation, temporary/emergency financial assistance, pension for low-income vets, housebound veterans and widows in need of nursing home care, VA health benefits, Ohio Veterans Home Benefits, state veteran ID cards, general information and transportation. The Hancock County Veterans Commission provides rides to the following veterans medical facilities: Toledo Outpatient Clinic, Ann Arbor VAMC, Lima Outpatient Clinic, Dayton VAMC, Marion Outpatient Clinic and Columbus VAMC and other facilities on a case-by-case basis. Rides are provided in county vehicles by its staff of drivers. The Hancock County Veterans Commission also contracts additional transportation services within Hancock County through HATS transportation at HHWP CAC.

The American Cancer Society

The American Cancer Society is a national non-profit agency whose goal is to eradicate cancer. Until then, they support those who suffer from cancer through several different programs. It's Road to Recovery program provides rides to and from cancer-related medical appointments for patients who otherwise might not be able to get there. Based on eligibility and availability, the program utilizes volunteer drivers to take patients to cancer treatment and back home. They provide curbside-to-curbside and door-to-door transportation services on demand. **Note:** This service is currently on hold due to Covid.

Comfort Keepers

Comfort Keepers is a private, for-profit business that provides home health care options so seniors may remain safely in their homes. Its service area is Putnam, Hancock, Wood, Wyandot, Crawford and Seneca counties. It provides companionship, home making, personal care services, grocery shopping, errands, bathing, dressing, incontinence care and personal emergency response systems. As part of its business, Comfort Keepers offers rides to people that need to get from their homes to any appointments, grocery shopping, or errands per their cost schedule.

Fox Run Manor

Fox Run Manor is a skilled nursing facility in Findlay. It is a private for-profit organization with 120 clients in the age range of 66 to 85. Fox Run Manor has one wheelchair accessible vehicle for transporting clients to social activities and emergency appointments.

For medical transportation needs, Fox Run Manor uses Hanco Ambulance through the Blanchard Valley Health System. Medicare pays the cost of these trips if a stretcher is required, if not, clients must pay for their own ambulance trip.

For Fox Run Manor clients, the most needed transportation is for doctor's appointments and hospital visits. Depending on the needs of the client, curb-to-curb, door-to-door, and door-through-door would be the most beneficial methods of transportation.

Daily, only five percent of the clients need transportation. Thirty-five percent of clients only need transportation occasionally. Fox Run primarily utilizes HATS and the local taxi services to transport their residents to and from appointments.

In the future, Fox Run Manor would like to see more availability on weekends, for short notice visits, and for wheelchair passengers. HATS is sometimes booked too far out to be useful for their clients.

City Mission

The City Mission is a private non-profit organization providing emergency services for the needy and homeless primarily in Hancock County. The Mission has one non-accessible 15 passenger vehicle ***and provides non-emergency medical transportation through Hancock JFS to its clients.*** The City Mission also provides bicycles to clients. All City Mission services are free of charge and the facility operates 24 hours a day, 7 days a week.

A Renewed Mind

A Renewed Mind, a division of Ohio Guidestone, is a private, not for profit 501(c) 3 behavioral health care organization. They work to deliver personalized, high-quality behavioral health services to our community in a compassionate manner. A Renewed Mind has developed a reputation of providing quality services based on commitment to respecting the individual and forming strong therapeutic relationships. A Renewed Mind has staff members that perform on-demand transportation services for their clients only as needed with agency vehicles. They also purchase tickets or tokens for other modes of transportation. Transportation services are paid for through Medicare, TriCare, Medicaid, county board and self-payment. A Renewed Mind also gives out information and referrals to their clients for transportation needs.

Keeping Kids Safe, Inc.

Keeping Kids Safe, Inc. is a private non-profit foster care agency that is licensed by the state of Ohio. Keeping Kids Safe is devoted to providing safe and loving foster homes for children. They are dedicated to modeling and teaching Christian values and morals while empowering children to thrive emotionally, socially, cognitively and physically. Keeping Kids Safe has staff that provides clients only with curb-to-

curb, door-to-door and door-through-door services on an as-needed basis. This transportation is provided by agency-owned vehicles. Group events are covered by a charter service.

Family Resource Center

The mission of Family Resource Center (FRC) is to provide specialized behavioral health services to children, youth, adults, and families in our multicultural communities in order to strengthen family life and promote personal growth. FRC is a private non-profit organization licensed by the Ohio Department of Mental Health and Addiction Services (Ohio MHAS) and has received national accreditation by the Commission on Accreditation of Rehabilitation Facilities (CARF).

This organization serves all clients regardless of ability to pay. FRC accepts Medicaid, Medicare and some private insurances. Client-pay and subsidies for essential services are offered based on family size and income.

The organization provides transportation on a case-by-case basis for their clients as needed. Family Resource Center also reimburses friends/family of clients and gives out information about transportation services that are being offered.

Organizations that use and/or refer people to available transportation resources

Hope House

Hope House is a private, non-profit organization assisting Hancock County residents facing a homeless crisis. With a mission to *provide housing solutions, support, and education to meet the needs of individuals and families facing homelessness in our community.*

Some of the staff provides transportation to clients only as needed. Hope House also provides HATS tickets on an as-needed basis to its clients. Hope House estimates that 75 percent of clients need curb-to-curb transportation at least occasionally with 45 percent needing daily transportation. Currently, no affordable transportation exists for early first shift and late-night shift workers. The most common destinations for clients are the grocery, doctors' offices, and human service agency offices. The average amount Hope House spent in transportation for clients over the last 3 years is \$3,026. Staff member also used personal vehicles and were reimbursed for mileage if securing other means of transportation was unsuccessful. Hope House would like to see regular routes and more hours of transportation offered as well as same-day service options.

Hancock County Board of Developmental Disabilities (Blanchard Valley Center)

Hancock County Board of Developmental Disabilities (Blanchard Valley Center) is a county agency funded through local levies along with state and federal dollars. BVC supports approximately 630 individuals with developmental disabilities in the community from birth through the end of life. Services provided by the HCBDD include pre-school and school services, Help Me Grow and Early Intervention, and service and support administration (case management) for children and adults with intellectual, physical and developmental disabilities. They coordinate the services an adult with a disability might receive through a provider such as Kan Du.

Area Agency on Aging 3

Area Agency on Aging 3 is a private non-profit organization that provides social services and referral information for older adults, persons with disabilities and caregivers. The traditional service area is Allen, Auglaize, Hancock, Hardin, Mercer, Putnam and Van Wert Counties but AAA 3 provides partial programming in additional counties. AAA 3 employs a Mobility Manager that works to meet transportation needs in the six-county service area. AAA 3 administers transportation call centers,

manages a website listing of transportation options in the region and provides transportation through contract to older adults and people with disabilities who have no other transportation options through the FIND A RIDE program.

50 North

50 North is a private non-profit agency that provides outreach services through case workers, chore services, mobile meals and grocery delivery. They also have a large facility that houses a physical fitness gym, The Senior Café that serves daily hot meals and offers several other activities to help enhance individuals well through their senior years to keep them active and vital. 50 North utilizes their vehicles for volunteers to transport groceries and hot meals, perform chore services and perform other outreach services that are available through their facility. They do not transport individuals but purchase passes or transportation on behalf of their clients and act as a referral service for transportation needs.

The United Way of Hancock County

United Way of Hancock County is positioned as a community impact leader/partner and steward of community dollars to solve human service issues and drive sustainable positive change through health, education, financial stability and responding to the critical needs with safety net services. While they are not a direct provider of transportation services, they are a major financial supporter of the local public transportation provider -- HATS, a program of HHWP Community Action Commission. The United Way is also an active participant of the Hancock County Transportation Coalition.

Kiwanis Village and Blanchard House

Kiwanis Village and Blanchard House are private, for-profit housing facilities sponsored by National Church Residences. They provide affordable housing options for disabled individuals and adults 60 and over. They do not provide direct transportation services but refer their residents to services available in Hancock County. They would like to see more on demand and same day services become available for residents.

Focus Recovery and Wellness Community

Focus is a recovery community organization offering free support and resources to anyone impacted by mental health, addiction or trauma issues.

Focus provides a warm, welcoming space for people to learn skills, meet new people and engage in their recovery. It connects people to other community resources when they are needed, provide education to the community and organize recovery events. They can support people and families on their journey of recovery from mental health problems, addiction, problem gambling or gambling addiction or trauma issues.

Cancer Patient Services

Cancer Patient Services is a private, non-profit organization that provides support to patients and families impacted by cancer with a variety of services at no cost. CPS offers financial assistance, nutritional supplements, prescription reimbursements, patient navigation, counseling services and healing arts programs. Individuals are eligible for all services provided by CPS if they have a cancer diagnosis and live or work in Hancock County. All services are provided free of charge. CPS relies on memorials, bequests, fundraising by friends and grants from the United Way of Hancock County to provide these much-needed services.

Cancer Patient Services reimburses mileage for patients and family/friends for appointments, pharmacy trips and hospital trips during cancer treatment. They also refer patients to other transportation services

within the community. The total amount spent on transportation in 2020 was \$10,149.34 and \$17,503.79 in 2019.

Children's Mentoring Connection

Children's Mentoring Connection is a private non-profit agency that provides a professionally monitored mentoring program for boys and girls ages 6 to 14 that are raised primarily by single parents and grandparents. CMC offers community and school-based programs. CMC does not operate transportation but provides referrals to clients.

Hancock County Job & Family Services

The Hancock County Department of Job and Family Services is part of the county government and provides social services, job training, healthcare, nutrition, income assistance, transportation and referral services to Hancock County residents. The Department of Job and Family Services provides demand response, curb-to-curb transportation for Medicaid Non-Emergency Transportation and Workforce Work Support Services. Medicaid Non-Emergency Transportation is provided by agency-owned vehicles, contracts with other transportation providers and reimbursements to clients and/or family or friends that provide necessary transportation. Clients receiving NET services must be enrolled in the Medicaid program. Work Support Services transportation is provided through contracts with area transportation providers as well as reimbursements to clients and/or family or friends that provide transportation directly related to employment. Work Support transportation services are provided to those that qualify through the County Prevention, Retention and Contingency (PRC) Program. There is no out of pocket cost to clients that are eligible for transportation services.

Existing Transportation Services

The following information is based on tabulations from the survey and interview results. A total of 22 organizations provided information about their services.

List of Transportation Service Providers

Agency Name: HHWP Community Action Commission (HATS Transportation)

Hancock County Veterans Services	Yes	Yes, contract third party	Public agency	1,048	None	Y

* Answering "Yes" indicates that your agency is closed door. Your agency is considered closed door if you ONLY provide transportation to your facility as a courtesy or if you ONLY serve a particular clientele that are enrolled in your agency programs (i.e. members of a sheltered workshop, or residents in a nursing home). Answering "No" indicates that your agency is open door. This means the service is open to the public or a segment of the general public defined by age, disability, or low income. For example, if an agency provides general transportation for anyone in the community who is over the age of 60, they are considered "open door". For example, an individual who is 60 or over can request transportation to a doctor's appointment or the grocery store regardless of their affiliation with your agency.

The participating organizations provide a wide range of transportation including ADA paratransit, demand response and on-demand as well as limited fixed-route and other transportation services. A total of 16 of the participating organizations provide services on weekdays. Three operate transportation on Saturdays and one on Sundays. Evening services after 7 p.m. are operated by one organization with no transportation available to the public after 9:30 p.m. on weekdays. The following table depicts the transportation service characteristics by agency.

Table 2: Transportation Service Characteristics

HHWP CAC's Hancock Area Transportation (HATS)	Demand response, door-to-door	Monday through Friday, 7:15 a.m.-9:45 p.m.	Yes	Curb-to-curb, door-to-door, drivers assist with limited number of packages, riders are allowed to bring their own personal assistant	CPR, first aid, blood borne pathogens, health physical, sensitivity to aging, driving record checks, background checks, drug & alcohol pre-employment, random, and post-accident testing

The following table provides basic information about transportation options other than the traditional public and human services transportation. Transportation options might include bike share, ride share, intercity, or taxi services, and more.

Table 4: Alternative/ Active Transportation Options

Transportation Option	Availability	Cost	Usage	Service Area
USA Cab	24/7	\$10 (1-way in town), \$2 per mile outside of Findlay	Not available	Hancock and surrounding counties
T-H Lift	Daily 6 a.m. until midnight	\$8 (1-way in town) ½ price fares for veterans	Not available	Hancock and surrounding counties
Lyft	24/7	Varies, based on distance, availability	Not available	Nationwide
Uber	24/7	Varies, based on distance, availability	Not available	Nationwide

The following table provides basic information about local travel training program options.

Table 5: Transportation Resources

Transportation Resource	Availability	Cost	Usage	Service Area
----------------------------	--------------	------	-------	--------------

Hancock County Mobility Management	Monday through Saturday 7 a.m.-5 p.m.	Free	Available to anyone	Hancock County
---------------------------------------	---	------	---------------------	----------------

The following table illustrates the technology used by each transportation provider for scheduling, dispatching, and/or GPS tracking vehicles.

Table 6: Technology

Agency Name	Name of Scheduling Software	Do you have an App for Transportation (Y/N)?	Name of Dispatching Software	AVL System/ GPS (Y/N)
HHWP HATS Transportation	CTS Tripmaster	No	CTS Tripmaster/Wave App	Yes
KanDu Group	None	No	None	No
Area Agency on Aging	Assisted Routes	No	None	No
K&T Medical Transport	CTS Tripmaster	Yes	CTS Tripmaster	Yes
Hancock Veteran Service Commission	None	No	None	No

Assessment of Community Support for Transit

Community support for transportation in Hancock County was voiced in stakeholder meetings, surveys and focus groups that were conducted in preparing the Hancock County Coordinated Human Service Transportation Plan. Local county and city/village governments have traditionally looked toward the private sector to run the county's primary local public transit provider, HATS Transportation, through the HHWP Community Action Commission. The primary local funding source for public transit is the United Way of Hancock County, with no public dollars being provided locally. Some of those interviewed were worried about the future of transit in the county if United Way funding were cut. Expansion of services, adding more availability on weekends and during early morning and evening hours, were cited as a key need locally. Accomplishing that key need will require additional local funding.

Safety

Transportation plays a key role in disaster preparedness, response and recovery. That fact was never more evident than during the past year and a half with the Covid-19 pandemic. Local transportation providers teamed with Hancock Public Health to shuttle people without transportation to local vaccination sites around the county. Local transportation providers are involved in the county's emergency management agency plans and can be coordinated to assist in evacuations, transporting emergency responders and assisting in a countywide disaster response.

Also, 24 percent of those surveyed said safety was one of their primary concerns regarding using local transportation options. Among the safety training that Hancock County's transportation providers require of their drivers include:

- o First Aid and CPR Training
- o Training in the use of AEDs
- o Pre-employment background checks
- o Drug and alcohol testing both pre-employment and random testing
- o Driving record checks
- o Criminal background checks
- o Pre-employment physicals
- o Blood borne pathogens training
- o Sensitivity to aging training
- o Passenger assistance techniques

Vehicles

Survey/Interview participants listed a combined total of 63 vehicles. Approximately 70 percent of the vehicles are wheelchair accessible. A vehicle utilization table is provided at the end of this chapter (Table 6).

All transportation providers, with the exception of Hancock County Job & Family Services, provide at least one wheelchair accessible vehicle, while some organizations have an entire fleet of wheelchair

accessible vehicles. The number of wheelchair accessible vehicles in the county are typically enough to meet current demand. As vehicles age, they require additional maintenance, may break down more often, and become costlier to operate. Vehicle replacement, based on age and condition, is vital to the overall cost effectiveness of the transportation services provided.

Summary of Existing Resources

An overall look at existing transportation resources and an inventory of current services allows better insight into opportunities to coordinate services and the transportation gaps that exist in Hancock County. Hancock County has a limited number of public and private transportation providers.

Multiple providers provide services only to their clients who qualify under certain criteria or are associated with the organization and its services. Other providers are open to the public and available with no requirements. The summary of existing resources illustrates gaps in services in Hancock County including, limited availability of public and accessible services on the weekends and during the early morning and late evening hours during the week and a lack of affordable intercounty transportation services.

Hancock Area Transportation Service provides demand response public transportation with a fleet of completely wheelchair accessible vehicles, primarily between the hours of 7:30 a.m. and 9:30 p.m. during weekdays. HATS also runs a limited Saturday schedule, typically, with three vehicles between 7:30 a.m. and 4:30 p.m.

Two local cab companies, USA Cab and T-H Lift, provide services to residents during the day and during hours when HATS is not in operation. Those services, though, tend not to be cost-effective for low-income residents. Neither also have wheelchair accessible vehicles.

Sunday service, aside from cab companies, is virtually non-existent in Hancock County. Local churches provide some transportation services on a volunteer basis on Sunday to get their congregations to church services, Sunday school, etc. Those services, though, vary by church and are run on an informal basis.

Individuals in Findlay have the greatest number of transportation options available to them, as well as the option to walk or ride bikes to conduct their daily business. Access to transportation in the county's outlying villages and rural areas, especially on weekends, can be a challenge for those residents to get to medical appointments and get the goods and services they need, which are typically located in Findlay.

IV. Assessment of Transportation Needs and Gaps

To better understand Hancock County's transportation needs, the planning committee examined research and data, as well as solicited input from the community to gather information about needs and gaps in transportation services.

The demographic and socio-economic conditions of the study area are discussed in the Demographics Chapter of this plan. The following overview is an evaluation of the gaps in service based upon geographic data as well as from the perspective of the targeted populations, transportation providers and the public.

As the lead agency in developing Hancock County's coordinated plan, the HHWP Community Action Commission brought together a variety of stakeholders in Hancock County to solicit input and request participation from any organization that could potentially be impacted by the coordinated transportation planning process. More information on how the lead agency engaged stakeholder and the public is available upon request.

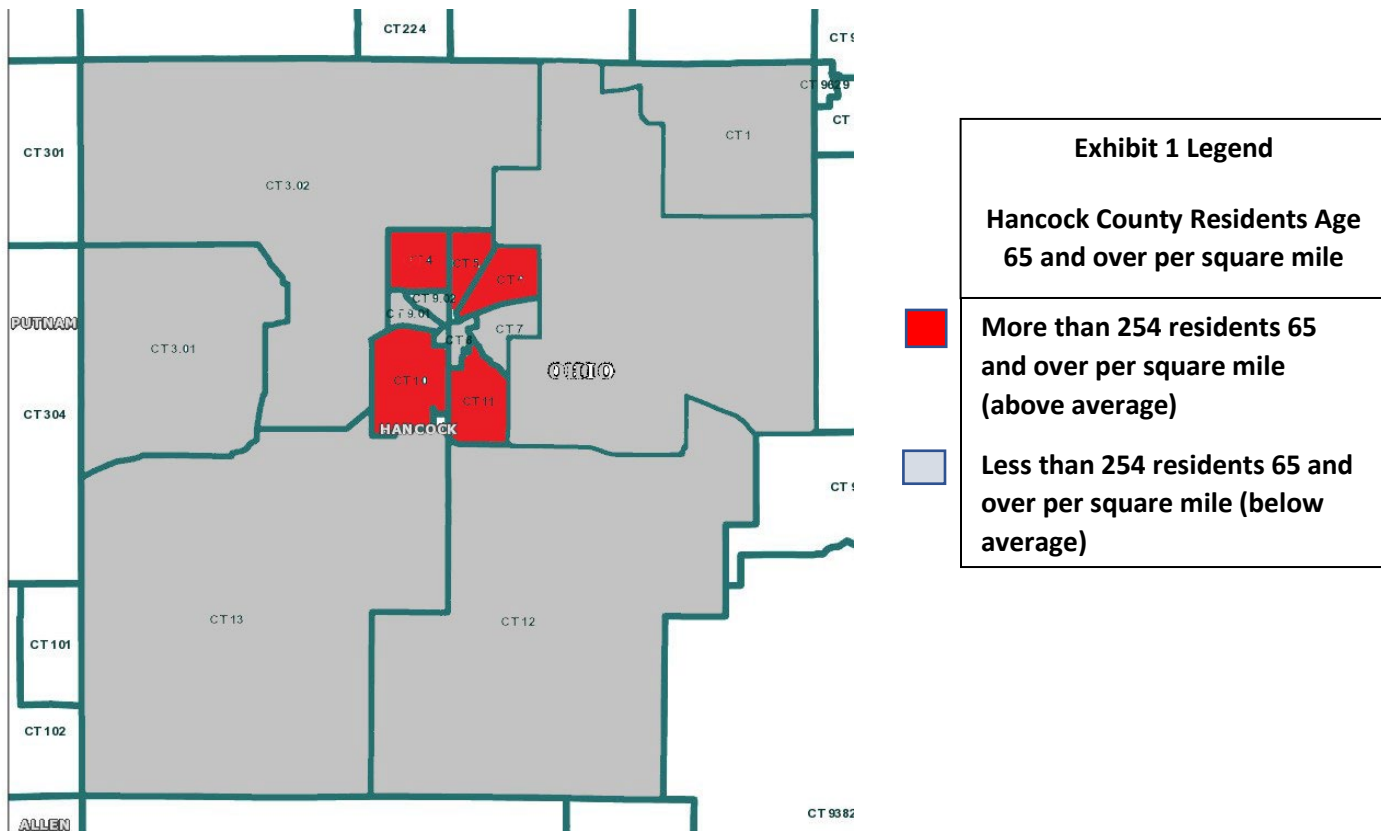

The following methods were used to assess transportation needs and gaps:

- Assessment of data and demographics.
- A review of Hancock County's previous coordinated transportation plan.
- Assessment of current transportation providers and stakeholders.
- Surveys of county residents, employers and transportation and human service providers.
- Interviews with those in the community who could help create impactful change.
- Input from focus groups, with an emphasis on senior citizens and the needs of those who are disabled.
- Public meetings with input on transportation needs, gaps in service, goals and objectives and strategies to accomplish those goals.

Demographic and Socio-Economic Data

Data for each target population group were aggregated by Census Tracts for transportation analysis. The demographic and socio-economic data is valuable because a comparison of where the highest and lowest densities individuals who are most likely to need transportation live. This information can then be compared to the locations of major trip generators and available transportation services.

The following Exhibit 1 illustrates the areas where the number of older adults (age 65 and older) is at or above the Hancock County average. The average number of older adults per square mile in the county is approximately 254 residents. Those areas below shaded in red have a population with a higher concentration than average of older adults.

Exhibit 1: Map of Population Density of Individuals Age 65 and Older

The exhibits below indicate the areas where the number of zero vehicle households is above the Hancock County's average. The absence of a vehicle in the household is often an indication of the need for transportation services. Exhibit 2-A features the density of zero vehicle households among renter-occupied homes. Exhibit 2-B features the density of zero vehicle households among owner-occupied homes.

Exhibit 2-A: Map of Density of Zero Vehicle Households

Percentage of zero-vehicle households (renter-occupied homes)

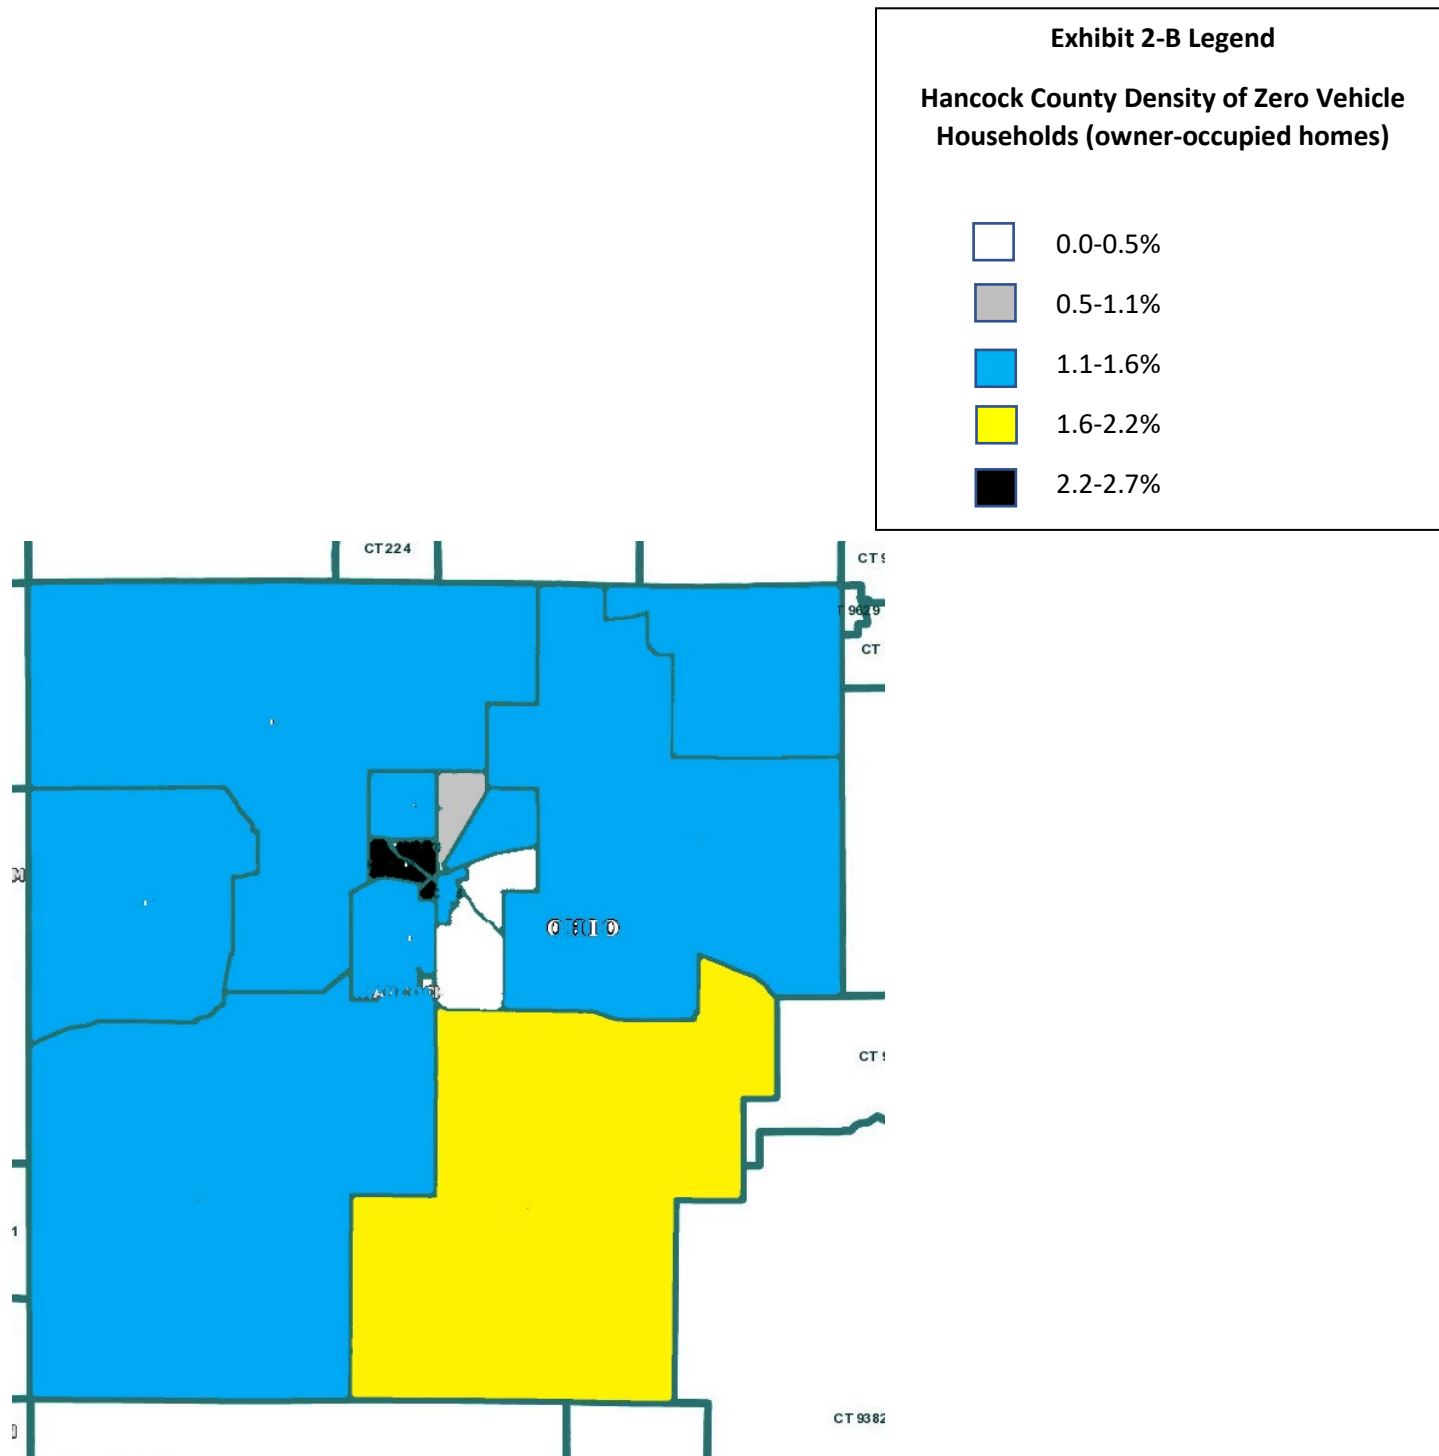

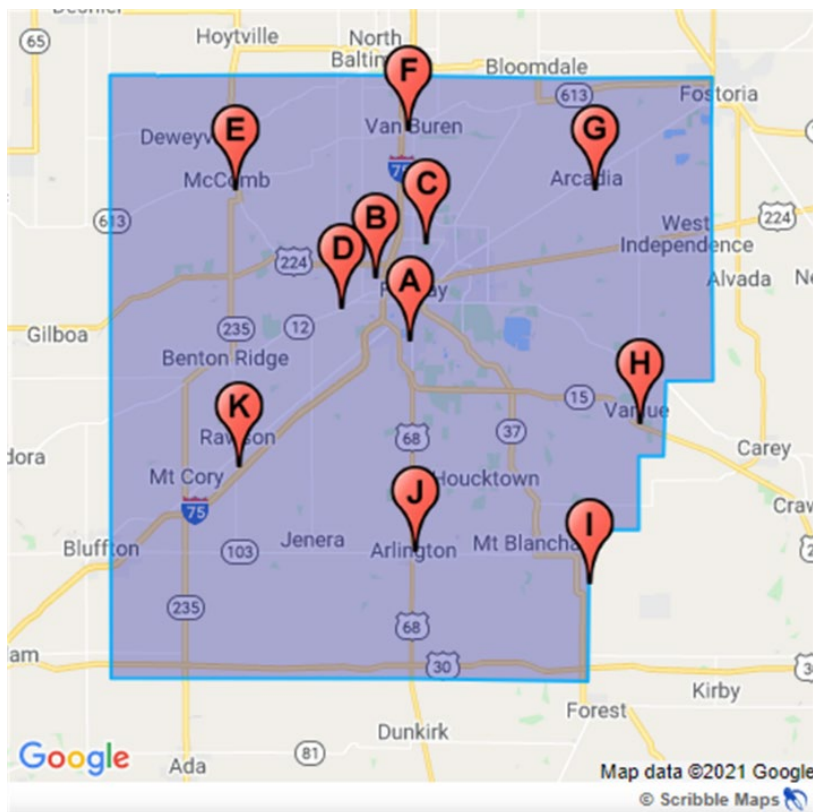

Exhibit 2-B: Map of Density of Zero Vehicle Households
Percentage of zero-vehicle households (owner-occupied homes)

The following maps illustrate the location of the top destinations for existing transportation providers as well as major trip generators for anyone in the area, including those who drive a personal vehicle. As indicated in the map, most Hancock County trip generators are located in and around Findlay.

Map 5.1: Map of Major Trip Generators (Education)

Transportation to and from schools by students and employees are major trip generators in Hancock County. The county has nine public school districts as well as the University of Findlay and Owens Community College. Below are the locations of schools throughout the county.

Hancock County Education Trip Generators

- A Findlay City Schools
- B University of Findlay
- C Owens Community College
- D Liberty-Benton Local Schools
- E McComb Local Schools
- F Van Buren Local Schools
- G Arcadia Local Schools
- H Vanue Local Schools
- I Riverdale Local Schools
- J Arlington Local Schools
- K Cory-Rawson Local Schools

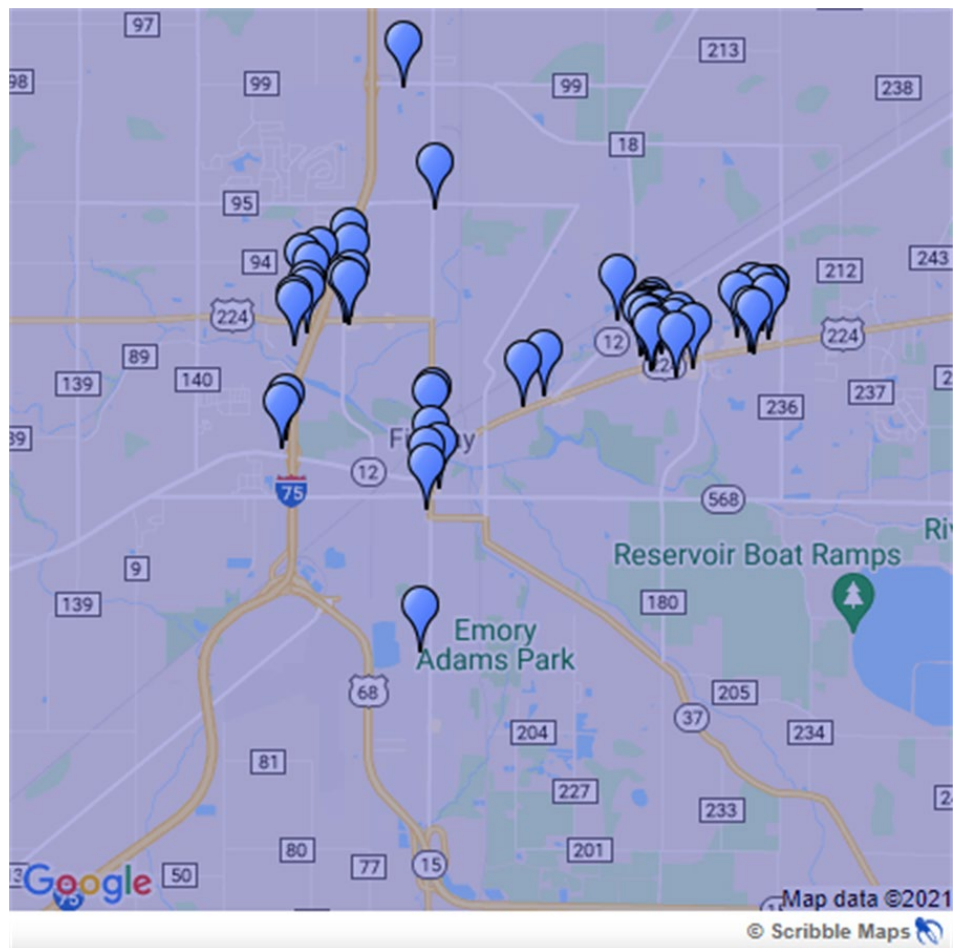

Map 5.2: Map of Major Trip Generators (Government)

Business conducted by government agencies like the City of Findlay, Hancock County, the U.S. Postal Service, Ohio Bureau of Motor Vehicles and other agencies also account for a significant number of trips during weekday hours. Most government agencies/services are located in downtown Findlay at the city's municipal building and county courthouse. Other county offices, as well as the offices for the Ohio Bureau of Motor Vehicles are on the western edge of the city along Hancock County Road 140. Below are the locations of key government offices in the county.

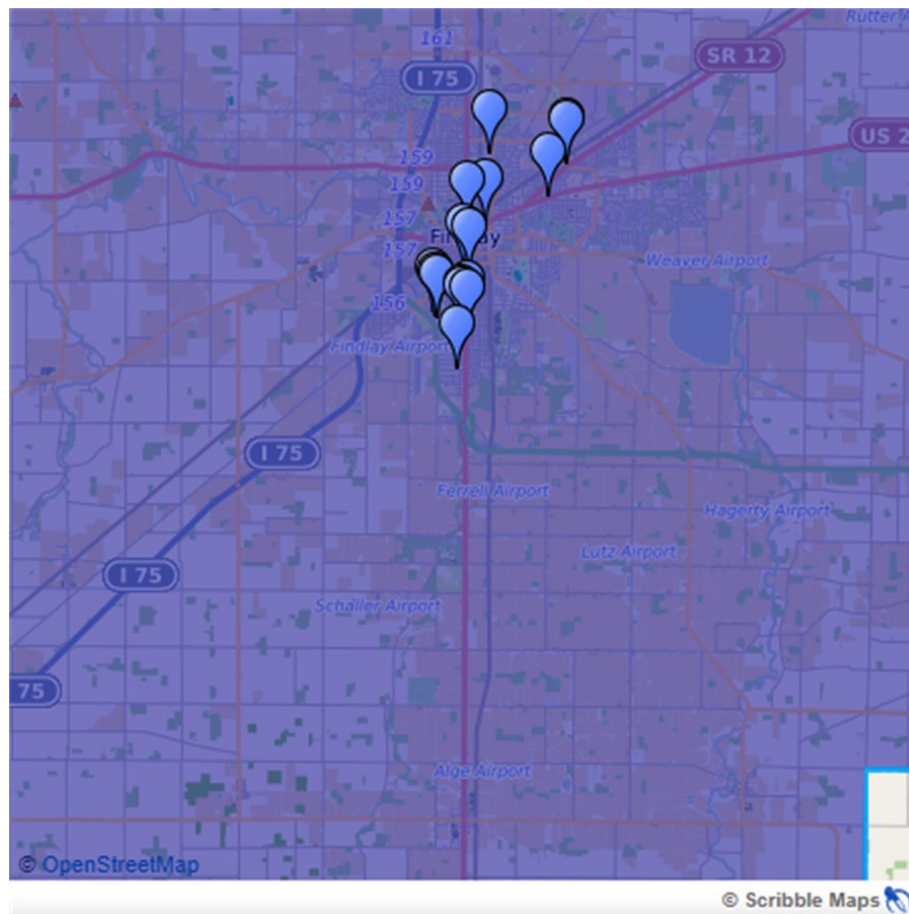

Map 5.3: Map of Major Trip Generators (Retail)

Retail operations, grocery and department stores, restaurants and other specialty stores where residents go to acquire goods and services for their daily needs are also key trip generators. Most Hancock County retail establishments are primarily located in Findlay. Retail is largely concentrated in three parts of the city --- on the eastside around Tiffin Avenue, along the I-75 corridor and in downtown. Below are the areas of the county where key retail travel occurs.

Map 5.4: Map of Major Trip Generators (Medical)

Medical facilities are also key trip generators. They can include hospitals, doctor's offices, clinics, dialysis centers, dentists and physical therapy centers. Many of Hancock County's medical facilities are primarily located in Findlay. The county's medical facilities are grouped in the south end of Findlay, around Blanchard Valley Hospital as well as in the northeast part of Findlay off Tiffin Avenue. Below, are where the key medical trip generators are located.

Analysis of Demographic Data

The analysis of Hancock County's demographics data shows an aging population with a relatively stable population base in the future. The numbers also show an increasing population of elderly and individuals with disabilities in the county. Among the challenges in the future may be a need for additional services within Hancock County's rural areas. Transportation services are available to the county's rural residents but are harder to come by than for residents in Findlay. Other challenges include after-hours, weekend and holiday transportation when public transportation is unavailable. Most of the county's primary trip generators are in Findlay, where the majority of the county's residents live.

General Public and Stakeholder Meetings/Focus Groups

HHWP Community Action Commission hosted and facilitated five local meetings and focus groups at Findlay Senior Homes, Findlay Senior Towers, Good Samaritan Assisted Living, 50 North and the City Mission to discuss the unmet transportation needs and gaps in mobility and transportation. Sixty-eight people participated in the meetings. Of those, 45 self-identified as older adults and 17 self-identified as being a person with a disability. More information about what meetings were held and attendance at those meetings is available upon request.

During the meetings, the HHWP Community Action Commission mobility manager presented highlights of historical coordinated transportation in Hancock County and discussed the activities since the last Coordinated Public Transit Human Services Transportation Plan that have helped to address some of the unmet transportation needs and gaps in services for the area.

Following the initial presentation, the stakeholders were asked to review the gaps in transportation services and needs from the previous plan/or update and identify any gaps that were no longer valid and any new needs/gaps, which the facilitator deleted/added to/from a list. The focus of the discussion was transportation for older adults, individuals with disabilities and people with low incomes. However, several topics discussed also impact mobility options for the public.

After the changes to the needs/gaps list were completed and new needs/gaps were added, each participant was asked to rank the needs/gaps using colored dots representing a high, medium, or low priority or that the remaining gap/need should be deleted.

Participants discussed more than a dozen mobility issues to achieve, preserve, avoid or eliminate through coordination during the meetings. Coordinated transportation stakeholders will consider these unmet needs when developing transportation goals and strategies and grant applications. The exhibit at the end of this section provides a summary of the unmet mobility needs discussed during the meeting as well as the needs identified by focus groups, stakeholder interviews and survey results.

In addition, participants in the meetings were given flyers detailing their best transportation options in Hancock County and the phone number of the mobility manager to call with questions and concerns in the future.

Surveys

Three public opinion surveys were conducted in July through mid-September 2021 to collect data from the general public, senior citizens and residents with disabilities about transportation needs in Hancock County. The surveys were available through an online link, a QR code and in paper format widely circulated on social media and news media outlets. Flyers were posted around the county at social service agencies and local public libraries.

There were 162 surveys returned by the public from a community transportation needs survey and a senior transportation needs survey conducted by the Hancock County Mobility Manager from July through mid-September 2021: 23 percent of individuals identified as disabled while 53 percent of persons who took the survey said they were senior citizens. There were other specialized surveys conducted that were sent to county employers and social service agencies.

Exhibits on following pages summarize key components of the survey.

Exhibit 3.1 Geography of Survey Respondents

A total of 129 of the 162 survey respondents were from Findlay. The remainder came from other Hancock County villages.

Exhibit 3.2: Trips by Mode of Transportation

The majority of survey respondents use their personal vehicles to get where they need to go. Riding with family and friends (33 percent) and public transportation (20 percent) also rated highly in the survey.

Exhibit 3.3: Trips Needed by Destination

Grocery and retail shopping and restaurants were the top trip destinations according to respondents at 46 percent. Medical appointments, banking and trips to the post office/banks are also high on the list.

Exhibit 3.4: Survey respondents' employment status

As far as employment status goes, 65 percent of respondents said they were employed outside of their homes. There were 28 percent of respondents who said that they were retired.

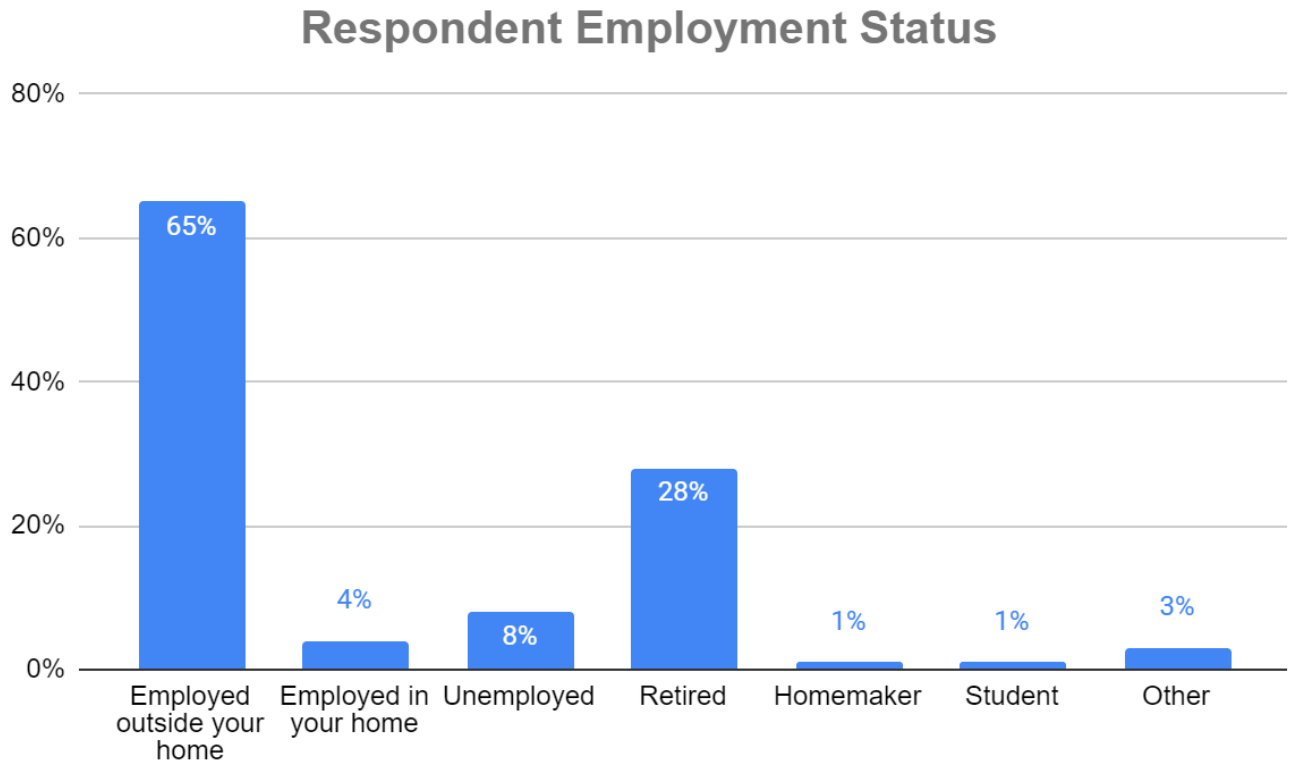

Exhibit 3.5: Age of survey respondents

About 1/3 of the respondents to the survey in Hancock County were age 65 and older. Another 30 percent of those surveyed were between the ages of 55 and 65.

Exhibit 3.6: Days transportation is most needed

Mondays and Wednesdays were the days of the week transportation was most needed. Followed by Tuesdays and Fridays.

Exhibit 3.7: Time transportation is most needed

Daytime hours are when survey respondents said they needed transportation most. Nearly a third of respondents said they needed transportation between 7 a.m. and noon or noon and 4 p.m. A significant number of residents need transportation before 7 a.m. and between the hours of 8-10 p.m. when public transportation is unavailable or extremely limited.

Exhibit 3.8: A lack of transportation in the past year

More than half of the respondents said they haven't had any issues with transportation in the past year. Another 31 percent of folks responded that they had problems getting where they wanted to go between 1-5 times in the past 12 months.

How often has a lack of transportation affected you in the past year?

Exhibit 3.9: What can make local transportation options more appealing?

The answers on what would make local transportation options more appealing was evenly split with seven of the eight options listed garnering between 31 and 38 percent response rate.

Exhibit 3.10: What would you like to see to improve transportation in your community?

Among those surveyed, respondents listed more available transportation options as the top way to improve transportation in the community at 45 percent. Bike and pedestrian friendly streets garnered 20 percent of the votes with cheaper transportation options (19 percent) and more rideshare programs (16 percent) close behind.

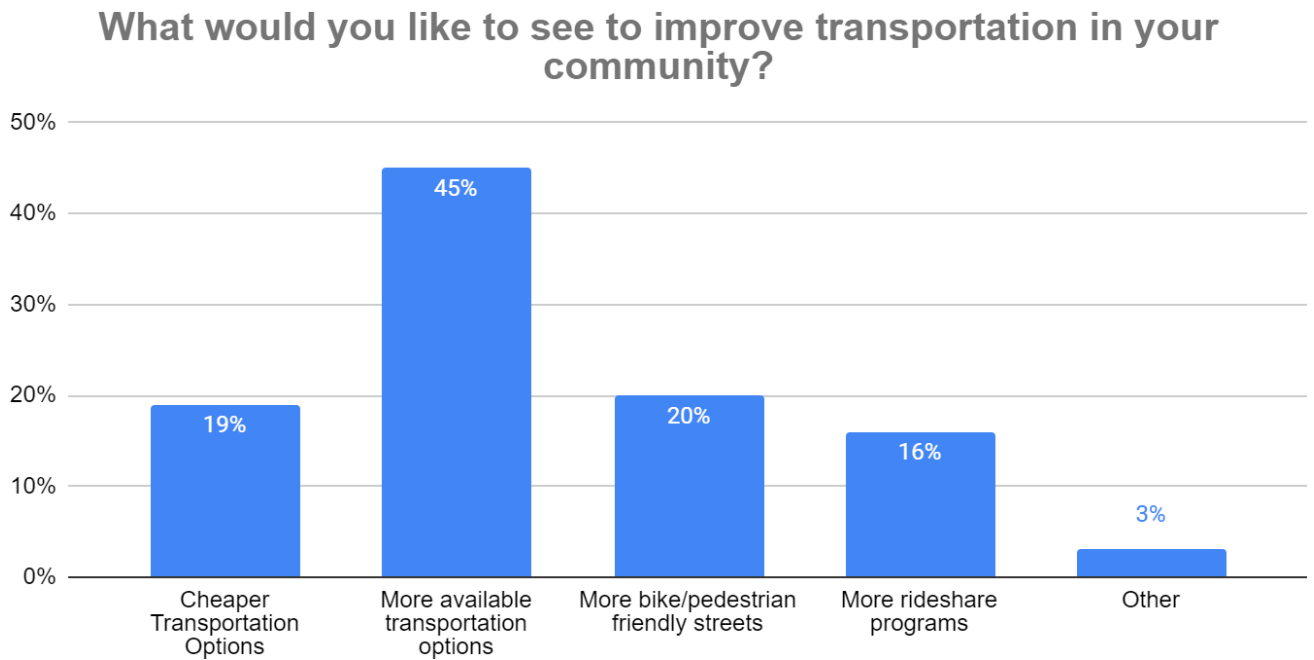

Exhibit 3.11: What areas do you need transportation to?

Aside from Hancock County, Lucas County (24 percent), Wood County (14 percent) and Franklin County (11 percent) were the top out-of-county destinations sought by respondents. Most of those rides were primarily for medical appointments.

Challenges to Coordinated Transportation

In addition to identifying needs, the planning committee gathered information from stakeholders and used their own professional experience to identify challenges to providing coordinated transportation services. These challenges include the following:

- o Current shortage of drivers/aging transportation staffs.
- o Lack of availability for same-day, next-day transportation.
- o Lack of marketing/communication of available transportation services.
- o Transportation limited primarily to weekdays.
- o Time/costs involved to transport riders within the county outside of Findlay.
- o Securing more funding to support the county's current coordination efforts.
- o Lack of coordination between regional transportation providers.
- o Lack of transportation for employment for second- and third-shift workers.
- o Limited access to public transportation due to poor sidewalks, front porch, door and/or steps in need of repair for safe egress for disabled passengers.
- o Organizational buy-in for coordination, sharing of costs, etc.

- o Lack of afterhours/weekend transportation options.
- o Lack of funds and personnel to increase number of buses and /or times of operation.
- o Desire for weekend service and extended hour of operation during the week.
- o Ability to travel further distances.
- o Ability to secure services with little or no advanced reservation required.
- o Coordinated trainings for drivers.

Summary of Unmet Mobility Needs

The following table describes the identified unmet transportation needs that were identified and the method used to identify and prioritize each need. Needs are listed in order of their rank in highest to lowest priority.

Exhibit 4: Prioritized Unmet Mobility Needs

Rank	Unmet Need Description	Method Used to Identify and Rank Need
1	Evening and early morning transportation availability for second- and third-shift workers	Surveys, focus groups, interviews with stakeholders
2	Greater awareness of transportation options by the community	Focus groups, surveys
3	Sustain current service and examine possible expansion of service during weekends, especially Sunday when transportation is unavailable	Surveys, focus groups
4	Additional local funding	Transportation coalition, focus groups
5	Regional coordination with adjoining counties to make cross county transportation more efficient, cost-effective	Transportation coalition, surveys, focus groups
6	Transportation needs of 50-59 year olds who don't qualify for other transportation programs	Surveys, transportation coalition, interviews with stakeholders
7	Fixed-route transportation with scheduled stops	Transportation coalition, surveys, focus groups
8	Additional drivers/coordinated driver training	Transportation coalition, interviews with stakeholders
9	Implementation of active transportation plan	Surveys, transportation coalition, interviews with stakeholders
10	More outreach, better service to outlying parts of the county	Surveys, transportation coalition, focus groups

V. Goals and Strategies

Developing Strategies to Address Gaps and Needs

Strategies for improving transportation for Hancock County should address the service gaps and user needs identified in this plan, if they are to be effective. As described, the gaps and unmet needs were based on information obtained from geographic analysis, the attendees participating in the meetings, and responses to the public survey.

Based on information gathered throughout the planning process, the HHWP Community Action Commission developed the following strategies to address the gaps and unmet transportation needs. Priority levels are assigned by considering the primary funding sources that could be available to support

plan implementation compared to the importance of meeting this unmet need expressed by the public and stakeholders. Not all strategies are activities specifically eligible for funding under the existing programs, nor is it guaranteed that sufficient funding will be available to achieve every strategy identified. In addition, the local stakeholders will need to provide support and commit to pursuing the strategies if they are to be accomplished. Nonetheless, these strategies have been tailored to the identified primary gaps and needs.

Below is an outline describing the prioritized strategies to address each of the identified unmet transportation needs and gaps in service.

GOAL #1: Sustain and expand availability of affordable transportation on nights and weekends

Needs being addressed: Senior citizens, disabled would achieve expanded mobility options and second- and third-shift workers currently have limited affordable transportation options to get to and from work.

Strategy 1.1: *Research and implement an expansion of service hours to start at 6 a.m. and end at midnight to connect residents with expanded employment opportunities.*

Timeline for Implementation: Ongoing, congruent with the Transit Development Plan timeline.

Action Steps:

- o Examine the options of car/van pooling or rideshare options for Hancock County's second- and third-shift workers.
- o Explore tax break options for employers for transportation.
- o Continued outreach and support for extension of service hours.
- o Identify how much funding would be needed for service expansion.
- o Locate funding opportunities and partnerships.
- o Work with Hancock Alliance, local employers and staffing agencies to assess service needs/ways to assist employees with transportation issues.
- o Use data and community to create a pilot program.

Parties Responsible for Leading Implementation: HATS Transportation; Hancock County Mobility Managers.

Parties Responsible for Supporting Implementation: Hancock County Alliance; Local employers; employment agencies, ODOT, FTA.

Resources Needed: Local funding, additional staff, staff time, technology, marketing.

Potential Cost Range: Dependent on level of expanded services.

Potential Funding Sources: Contract revenue; local fare reimbursements; employer reimbursement; municipal, county and state funds; federal programs; transportation tax levy.

Performance Measures/Targets

- o Establish at least one rideshare program at a local employer.
- o Conduct surveys/interviews to determine demand.
- o Completed plan for pilot project to apply for funding sources.
- o Successful expansion of services.

Strategy 1.2: *Reach out to local for-profit transportation providers and taxi services to market and advertise any services they offer that increases after-hours transportation availability.*

Timeline for Implementation: Continuous and ongoing.

Action Steps:

- o Talk with local taxi companies and other for-profit providers to assist them in informing the public of the after-hours services they can provide.

Parties Responsible for Leading Implementation: Hancock County Mobility Manager.

Parties Responsible for Supporting Implementation: Hancock Transportation Coalition; employers, employees, general public who may use those services.

Resources Needed: Local funding, marketing.

Potential Cost Range: \$2,000-\$3,000.

Potential Funding Sources: Customer fares, employer assistance, local grants.

Performance Measures/Targets

- o Increased for-profit ridership.
- o Greater awareness of local transportation options.
- o Fewer residents with after-hours transportation issues.

2022 GOAL PROGRESS UPDATE: HHWP has applied for a transit development study to take place in 2023 to explore better ways to serve the county at current funding levels. As of now, Saturday service was suspended during the summer because of budgetary concerns due to high fuel prices and those service hours were rolled into the Monday through Friday schedule when transportation is typically needed most. A few residents are still seeking Saturday transportation. Workforce and medical transportation continues to be the county's biggest gap, particularly for those at the end of second shifts and during the early-morning hours.

2023-2024 GOAL PROGRESS UPDATE: HHWP Community Action Commission received a grant from ODOT for a Transit Development Plan. The Transit Development Plan timeline is Fall 2023-Summer 2024. It is expected that the Transit Development Plan will help inform the future goals and strategies of the next iteration of this Coordinated Human Services Transportation Plan. HATS Public Transportation runs from 7:15 a.m.-9:30 p.m. Monday-Friday, with no weekend availability. 51% of HATS transportation is for workforce transportation. Bike racks were added to 5 HATS vehicles, so that if someone on 2nd shift

wants to ride HATS to work, they can then bike home after work. The two taxi cab companies are very busy, and their information is included on the transportation resources guide that is updated and distributed by the Mobility Manager. Additionally, the workforce conversations are also being discussed within the Immigration Coalition (which the Mobility Manager is a member of) and with a group of Human Resource professionals in the Tall Timbers Industrial Park (as their manufacturing operating hours need to be considered). The committee discussed the need for weekend transportation for employment purposes, as many retail/restaurant workers still need to work on the weekends. Perhaps there could be a ride-share agreement among employers at various points around town. This is another idea to explore.

2024-2025 GOAL UPDATE: HHWP Community Action Commission completed the Transit Development Plan grant from ODOT. Nelson/Nygaard was the consulting firm. The resulting suggestion was a three-part transportation system, including four fixed routes within the city of Findlay, an ADA paratransit service that would operate $\frac{3}{4}$ of a mile from the fixed routes, and on-demand for the remainder of Hancock County. The director of HATS and the Mobility Manager met two times with the human resources group at Tall Timbers Industrial Park to discuss their workforce transportation needs, including all shifts of work and the proposed new structure for public transit. Both taxi cab companies added employees for weekend shifts. They have also seen a need for evening transportation around 9:00 p.m. for employment transportation.

GOAL #2: Increase funding for local public and coordinated transportation

Needs being addressed: Sustaining Hancock County's current transportation services now and into the future with the possibility of expansion to better serve all county residents and help alleviate unmet needs and gaps in service.

Strategy 1.1: *Continued and increased local support by encouraging organizations that require transportation to contract with HATS and other transportation providers when possible. Human service agencies and other organization could realize cost savings by purchasing services rather than providing them themselves.*

Timeline for Implementation: Continuous and ongoing.

Action Steps:

- o Create relationships with area human service agencies in letting them know what services can be offered, the possible cost and availability of those transportation services.
- o Provide agencies with a cost breakdown to complete an analysis to determine potential savings.
- o Work with community partners to coordinate efforts to best serve clients' needs.

Parties Responsible for Leading Implementation: Mobility manager; Hancock Transportation Coalition; HATS.

Resources Needed: Staff time.

Potential Cost Range: Minimal.

Potential Funding Sources: None.

Performance Measures/Targets

- o Number of clients getting needed transportation services.
- o Local matching funds generated by contractual agreements.
- o Number of new agencies approving contracts.

Strategy 1.2: *Continued and increased local, state and federal support for transportation.*

Timeline for Implementation: Continuous and ongoing.

Action Steps:

- o Establish rapport with local and government and state legislative officials to explore the possibility of increased funding from the city and county for transportation services for the community.
- o Explore all options for state and federal transportation funding sources.
- o Locate and apply for grant funding from local, regional and statewide groups and organizations to help to increase the local share of transportation match funds for all the county's transportation providers.
- o Examine the possibility of local support for a tax levy dedicated to local transportation improvements.

Parties Responsible for Leading Implementation: Hancock County Mobility Manager, HHWP Community Action Commission, transportation providers, human service agencies, other community organizations, government agencies.

Parties Responsible for Supporting Implementation: Hancock Transportation Coalition.

Resources Needed: Staff time, grant writing services.

Potential Cost Range: Could vary with effort, resources that are currently available.

Potential Funding Sources: Section 5311, 5310 funding, grants, private donations, state, county or local appropriation of funds, non-DOT funds from federal programs.

Performance Measures/Targets

- o Increased funding from local sources.
- o Grant applications for local, state, federal and private sources.
- o Pool of local and county funding dedicated to local transportation.

2022 GOAL UPDATE: HATS has been working on a plan with the Community Foundation and United Way to help increase local funding for local public transportation. Community partners have been identified to approach for future projects to go toward local funds that can be matched with federal dollars for transportation. In the short term, the Hancock County Commissioners have appropriated \$100,000 to go toward public transportation's local match in each of the next three years. In the meantime, HATS has concentrated on monetizing some of the trips they have been previously providing at the subsidized rate.

2023-2024 GOAL UPDATE: HATS Public Transportation has been able to work with local agencies to renew funding and establish new contracts. Some of these agencies include the Hancock County Veterans Service Administration, Birchaven Retirement Village, and Family Resource Center. There have also been some grants to provide funding for certain populations, such as 50 North for seniors and The Community Foundation for rides to the Family Center. There is still an ongoing and increasing need for funding. The defined need for funding will rely on which public transportation model is chosen to move forward at the end of the strategic planning process. The committee discussed developing a benefits package marketed towards employers and Human Resources professionals to discuss the benefits of a memorandum of understanding by bundling public transportation trips to specific locations.

2024-2025 GOAL UPDATE: ADAMHS Board contracts with local mental health agencies, and then those organizations contract with HATS. One example of this is the Family Resource Center. HATS also has other contracts, such as 50 North, the Findlay Family YMCA Child Development Center, and Birchaven Retirement Village. ODOT has funded Mobility Management in Hancock County through June 2025. ODOT has also funded some new equipment, etc. for HATS' expansion to Hardin County in July 2024. The committee discussed developing a benefits package marketed towards employers and Human Resources professionals to discuss the benefits of a memorandum of understanding by bundling public transportation trips to specific locations. Potential audiences could be smaller employers, Chamber members, Tall Timbers HR professionals, and FAHRA. The Transit Development Plan study determined that the next two steps will be to secure five low-floor accessible vehicles and an implementation plan. The HHWP Community Action Commission was able to secure local match for these in the amount of \$264,000. \$100,000 pledged from the Findlay/Hancock County Community Foundation, \$100,000 pledged from the City of Findlay, and \$64,000 pledged from the Hancock County Commissioners. Also, HHWP Community Action Commission staff members went to the Ohio Statehouse to visit legislators for Ohio Loves Transit Day in February 2025.

GOAL #3: Better meet the needs of Hancock County's rural residents outside of Findlay.

Needs being addressed: Outreach on transportation options and how to best utilize the transportation services that are available to rural areas of Hancock County.

Strategy 1.1: Assess the transportation needs of residents in the county's villages and townships.

Timeline for Implementation: Continuing and ongoing

Action Steps:

- o Meet with Hancock County's village mayors and councils as well as township trustees as often as possible to continue to identify transportation needs and gaps in their communities.
- o Network with community groups, senior living facilities and faith-based organizations to help educate members and clients on transportation options available in Hancock County.
- o Connect with human service providers and medical providers to determine how many clients/patients live outside of Findlay.
- o Town hall meetings in rural communities to discuss options and inform residents about the mobility management program.

Parties Responsible for Leading Implementation: Mobility manager.

Parties Responsible for Supporting Implementation: Hancock County Village and township public officials, community groups, churches, social service and medical providers.

Resources Needed: Staff time.

Potential Cost Range: Mobility manager's salary.

Potential Funding Sources: 5310 Mobility Manager grant.

Performance Measures/Targets

- o Number of meetings with village and township officials.
- o Increase in number of trips taken by Hancock County rural residents.
- o Number of residents served/contacted by mobility manager outside of Findlay.

Strategy 1.2: Explore the possibility of scheduled service to Hancock County villages.

Timeline for Implementation: Continuing into 2024.

Action Steps:

- o Determine ridership potential for weekly schedule service to Hancock County's villages through surveys/focus groups.
- o Work with HATS to determine cost of weekly schedule service to Hancock County villages.
- o Coordinate with human service/medical providers and top retail destinations to determine feasibility of appointments matching trip days and times from Hancock County villages.

Parties Responsible for Leading Implementation: Mobility Manager, HATS.

Parties Responsible for Supporting Implementation: human service/medical providers, Hancock County rural residents.

Resources Needed: Possible additional HATS staff, vehicles; marketing materials.

Potential Cost Range: Dependent on service provided.

Potential Funding Sources: Fares, contracts with medical/human service providers, local grants, ODOT, FTA funding.

Performance Measures/Targets

- o Surveys/focus groups/interviews with village residents completed.
- o Budget completed detailing cost for schedule service to county.
- o Weekly service schedule to villages begins.
- o Increased use of transportation services by Hancock County rural residents.

2022 GOAL UPDATE: Weekly transportation was provided to Mount Blanchard residents through a project with the Community Foundation. Discussions are currently underway to possibly provide transportation on a regular schedule to the villages of Arlington, McComb and the city of Fostoria based around the current schedule of rides in those areas.

2023-2024 GOAL UPDATE: The HHWP Community Action Commission Transportation Director and the Mobility Manager meet with the County Commissioners at least two times per year to give updates about transportation, thank them for their funding, and ask for their input and support. Additionally, the Transit Development Plan committee has a member from McComb, and the Mobility Manager made a concentrated effort to include voices from all townships/villages on the Transit Development Plan surveys.

2024-2025 GOAL UPDATE: On our county's public transit, Hancock Area Transportation Services (HATS), people within Findlay usually ride to other places within the City of Findlay. One exception is that some Findlay residents travel to Hearthside in McComb from Findlay. The Mobility Manager presented to residents at Arlington Manor and did 2 senior car checks as part of the CarFit program. HATS sees that county demand is still limited for rural trips, and it is mainly for dialysis, medical, and employment. A cab company is providing a lot of rural workforce transportation to places such as the cookie factory in McComb, Home Depot in Van Buren, and the towns of Fostoria, Arlington, and North Baltimore.

GOAL #4: Improve and enhance marketing for all transportation services and providers to create awareness of transportation options through continued funding of Hancock County's Mobility Management program.

Needs being addressed: The lack of knowledge by the public and some social service agencies hampers access to shopping, medical appointments and education and social activities for those who do not know what transportation options are available to them.

Strategy 1.1: *The Hancock County Mobility Manager will create new a new general brochure listing transportation options for Hancock County residents as well as targeted publications for seniors, disabled, low income and veteran populations.*

Timeline for Implementation: Update as needed.

Action Steps:

- o Gather complete and accurate information from all transportation providers.
- o Create general and specialized Hancock County brochures.
- o Circulate brochures through all avenues in all areas of Hancock County including human service agencies, government offices, libraries, area employers, etc.

Parties Responsible for Leading Implementation: Hancock County Mobility Manager.

Parties Responsible for Supporting Implementation: Human service agencies, local transportation providers.

Resources Needed: Staff time, printing costs, software.

Potential Cost Range: Less than \$1,000.

Potential Funding Sources: Mobility management funds, grants, donations.

Performance Measures/Targets

- o Number of brochures created and distributed.
- o Focus groups/surveys to ascertain if the community is more knowledgeable about local transportation options.
- o Number of outlets where brochures are available.

Strategy 1.2: *Enhance the marketing of current transportation providers.*

Timeline for Implementation: Next 12 months.

Action Steps:

- o Meet at least twice a year with all the county's transportation providers both non-profit and for-profit services to determine best practices in marketing of their services to Hancock County residents.
- o Monthly Mobility Newsletter to spotlight transportation providers' drivers, special services and other positive attributes about the organization.
- o Solicit and write stories/video from transportation users, particularly seniors and those with disabilities, detailing how important transportation services are in their daily lives. Find other transportation-related info for human interest features. Pitch those stories to local/state/national media outlets quarterly.
- o Post provider information and updates to web and social media channels, with posts shared by providers themselves and their partners.

Parties Responsible for Leading Implementation: Mobility manager.

Parties Responsible for Supporting Implementation: Transportation providers.

Resources Needed: Staff time.

Potential Cost Range: Mobility manager salary.

Potential Funding Sources: 5310 grant.

Performance Measures/Targets

- o Regular meetings with transportation providers.
- o Number/frequency of newsletters.
- o Number of social media posts/shared and liked posts/web analytics of posts.

Strategy 1.3: *Increase Hancock County transportation information available on the internet and other outreach activities.*

Timeline for Implementation: In the next 12 months.

Action Steps:

- o Develop a comprehensive mobility management website linking to local transportation providers, top available transportation options, travel training and additional transportation resources.
- o Increase use of social media (Facebook, Instagram, Twitter) as an outreach tool.
- o Increased attendance and participation in community events/job fairs by Hancock County Mobility Manager.

Parties Responsible for Leading Implementation: Mobility manager.

Resources Needed: Staff time, software, web-hosting services.

Potential Cost Range: Less than \$1,000.

Potential Funding Sources: Mobility manager 5310 program.

Performance Measures/Targets

- o Dedicated Hancock County website planned and created.
- o Number of Facebook posts, creation of Instagram and Twitter accounts.
- o Number of community events/job fairs attended by Hancock County Mobility Manager.

2022 GOAL UPDATE: Mobility manager role was filled in June and new mobility manager Rich Kesler is getting the word out on the mobility management facebook pages and website, while meeting with local senior centers, low income housing managers. The HHWP also has a new website and will be updated with transportation information. Hancock Helps Transportation page is up to date with current providers.

2023-2024 GOAL UPDATE: The Mobility Manager role was vacant until filled in April 2023. The Mobility Manager posts regularly on Facebook. Also, she attends numerous resource fairs and information booths. In addition, she has presented to a variety of groups and plans to continue these efforts. The transportation resource list has been updated, maintained, and translated into two languages. It has been distributed to various constituencies, including Blanchard Valley Health System's care navigators and certain workforce populations.

2024-2025 GOAL UPDATE: The Mobility Manager checks to see if Hancock Helps (website) is up to date and sends edits as needed. Also, the transportation resource list has been translated to Spanish and Haitian Creole to meet the language needs of the county's residents. The list also has been made accessible by designing it in large font. The public transportation's elderly and disabled discount form has also been made accessible by designing it in large font. The Mobility Manager attends a variety of information fairs and community meetings to continue transportation discussions. Also, the Mobility Manager gives presentations, such as a transportation presentation to the "Adjusting to Vision Loss" support group through the Sight Center of Northwest Ohio and 50 North.

GOAL #5: Exploration of transportation pilot projects.

Needs being addressed: Possible test run for future service-routes in Findlay to senior living facilities, social service agencies, shopping districts, employment sites in the Tall Timbers area and distribution facilities.

Strategy 1.1: *Research opportunities to develop a local pilot program (ride share, service routes) utilizing available resources to enhance transportation options for Hancock County to address unmet transportation needs and gaps, improving access to medical care, employment and social services for underserved populations.*

Timeline for Implementation: Congruent with the Transit Development Plan.

Action Steps:

- o Research pilot projects that have made an impact in other similarly sized communities.
- o Develop a list of between three and five projects that could satisfy Hancock County's unmet needs and transportation gaps.
- o Develop a budget and find funding for agreed upon pilot projects.
- o Implement one or more pilot project and assess the results at the end of the pilot project time period.

Parties Responsible for Leading Implementation: Mobility manager, local transportation providers.

Parties Responsible for Supporting Implementation: Hancock County Transportation Coalition.

Resources Needed: Local funding, staff time, marketing, vehicles, technology.

Potential Cost Range: Dependent upon pilot project scope.

Potential Funding Sources: ODOT 5310, 5311 programs, private sector/employers, local community organizations, additional local, state and federal funds.

Performance Measures/Targets

- o Identify possible pilot projects.
- o Find funding and implement pilot project.
- o Measure pilot project's effectiveness through predetermined metrics and goals.

GOAL UPDATE 2022: HATS is in the early stages partnering with the Community Foundation and the United Way to facilitate a pilot project in the community with a fixed route to serve local businesses. Findlay is the largest city in Ohio that's a demand-response public transit system with no fixed-route service.

2023-2024 GOAL PROGRESS UPDATE: HHWP Community Action Commission received a grant from ODOT for a Transit Development Plan. The Transit Development Plan timeline is Fall 2023-Summer 2024. It is expected that the Transit Development Plan will help inform the future goals and strategies of the next iteration of this Coordinated Human Services Transportation Plan. There could be more opportunities for inter-county collaboration with public transportation coming to Hardin County in July 2024. Also, GoBus may expand to Northwest Ohio.

2024-2025 GOAL UPDATE: The Transit Development Plan identified a three-tier approach to public transit. HHWP Community Action Commission staff gave over 10 presentations to local leaders to discuss transportation overall and this new plan. Also, HHWP Community Action Commission expanded transportation to Hardin County in July 2024, so as that system gets established, there could be more opportunities for inter-county collaboration. Finally, the Intercity Bus Needs 2024 study from ODOT has identified that GoBus may expand to Northwest Ohio, and staff, city, and university leaders have met with ODOT representatives about this.

GOAL #6: Continue the process of pursuing an active transportation plan for Hancock County.

Needs being addressed: Improving transportation infrastructure for residents who choose or are forced to choose because of a current lack of transportation, to walk or bike to destinations to fulfill their daily needs.

Strategy 1.1: Work with Hancock Public Health, City of Findlay, Hancock Park District and other stakeholders on Hancock County's Active Transportation Plan.

Timeline for Implementation: Ongoing.

Action Steps:

- o Work with Hancock County cities, village and county officials in creating a draft of a countywide active transportation plan.
- o Create active transportation team.
- o Assist with submission of grant funding through various sources including, but not limited to, private foundations, community block grants and community revitalization grants.
- o Set up community meetings/focus groups for outreach and advocacy to gain the support of the community in the development and implementation of an active transportation plan.

Parties Responsible for Leading Implementation: Mobility Manager, Hancock Public Health, Hancock Park District, City of Findlay, Hancock County, Hancock Regional Planning, Hancock Transportation Coalition.

Parties Responsible for Supporting Implementation: ODOT, Ohio Department of Health.

Resources Needed: Funding, staff time, publications and printing, capital needs.

Potential Cost Range: Dependent on scope of project.

Potential Funding Sources: National and community foundations, ODOT, Ohio Department of Natural Resources, Ohio Department of Health, local and federal grants, private donations.

Performance Measures/Targets

- o Draft of active transportation plan.
- o Completed active transportation plan.
- o Funding awarded to project.

- o Implementation of active transportation plan.

2022 GOAL UPDATE: Funding is available for developing an active transportation plan through an ODOT consultant. The deadline is usually around April. A city, county or village must apply for the active transportation grant. Both the city and Hancock Park District have been involved in the discussion but no commitment from either group has yet to develop.

2023-2024 GOAL UPDATE: The City of Findlay has a “Findlay Forward Plan” that includes some elements of active transportation. In addition, the Mobility Manager has had a few preliminary meetings about Spin (e-bikes and e-scooters). Also, she is trying to get a group together to discuss bike programs within Findlay. Also, HATS now has 5 vehicles with bike racks (so riders can request a vehicle with a bike rack). The Mobility Manager also is on the Community Health Improvement Plan committee for the Health Department to continue discussing the intersections of transportation and health.

2024-2025 GOAL UPDATE: The Mobility Manager hosted many meetings about Spin (e-bikes and e-scooters) between the leaders at the City of Findlay and the University of Findlay. Additionally, a community survey was conducted to ask the community about this initiative. The priorities identified in the Transit Development Plan have taken precedence over this initiative. Also, the Mobility Manager attempted to gather individuals about a bike sharing program, but there was not a group consensus to move forward with a bike share program at this time.

GOAL #7: Establish a volunteer network of drivers to assist non-traditional transportation needs to help with Hancock County’s transportation gaps and unmet needs.

Needs being addressed: Supporting the transportation needs for residents that need transportation outside of traditional service hours particularly those who cannot afford those after-hours transportation options.

Strategy 1.1: *Develop a volunteer driver program.*

Timeline for Implementation: Unknown as of May 2024.

Action Steps:

- o Research volunteer driver programs in Ohio and surrounding states.
- o Find a host agency for the volunteer driver program.
- o Establish guidelines, policies, goals and best practices for volunteer driving program.
- o Research liability issues/insurance needed for a local volunteer driving program.
- o Survey local churches, human service and other agencies for a pool of volunteer drivers.

Parties Responsible for Leading Implementation: Hancock County Mobility Manager.

Parties Responsible for Supporting Implementation: Hancock County Transportation Coalition.

Resources Needed: Staff time, funding, drivers, vehicles.

Potential Cost Range:

Potential Funding Sources: 5310 program; federal, state and local grants.

Performance Measures/Targets

- o Create plan for local volunteer driving program.
- o Secure funding/insurance for program.
- o Recruit and train a minimum of three drivers.
- o Vehicles purchased for program.
- o Number of trips provided by volunteer driver program.

2022 GOAL UPDATE: No movement on this goal as of yet.

2023-2024 GOAL UPDATE: No movement on this goal as of yet.

2024-2025 GOAL UPDATE: No movement on this goal as of yet.

VI. Plan Adoption

The plan development/update process included older adults, individuals with disabilities, members of the general public and representatives from public, private and non-profit transportation and human services providers. The process included Hancock County Transportation Coalition meetings, stakeholder meetings, public surveys and focus groups. Once the draft was completed it was made available for public comment online and with paper copies advertised in local media outlets and online via social media. After the public comment period, a public meeting was held on Nov. 4, 2021 when the plan was adopted unanimously by the Hancock County Transportation Coalition. The Hancock County Commissioners subsequently passed a resolution approving the plan before the final version of the plan was submitted to Ohio Department of Transportation on Nov. 19, 2021.

Appendix A: List of Planning Committee Participants

The planning committee consists of representation from local agencies as well as participation of individuals with disabilities, older adults, and members of the general public. More information about the planning committee is available upon request by contacting Hancock County Mobility Manager Jamie Baker at 419-619-3936 or via email at jbaker@hhwpcac.com

Agency Representation

Name	Agency
Jamie Baker	HHWP CAC
Scott Lammers	HHWP CAC
Triena Miller	Hancock JFS
Randall Galbraith	Hancock JFS
Abbie Acord	Hope House
Ashley Ritz	Open Arms *Corrected 6/25
John Platt	United Way
Taylor Coote	United Way
Jennifer Swartzlander	ADAMHS Board
Kelly Sparks	KanDu Group
Jessica Halsey	Hancock Public Health
Karim Baroudi	Hancock Public Health
Kimberly Bash	The Findlay/Hancock County Community Foundation
Julie Baker	Owens Community College
Kim Hiett	50 North
Lisa Hablitzel	50 North
Eva Saldana	Associated Charities
Ruthie Tong	Findlay City Mission
Kyle Frias	Hancock County Veteran Services
Rob Martin	City of Findlay
Jeremy Kalb	City of Findlay

In addition to participants listed above, the planning committee also included representation of older adults, people with disabilities, and members of the general public. In addition to hosting a planning committee, the HHWP Community Action Commission and other planning committee members also conducted a wide variety of activities designed to increase involvement of community stakeholders in identifying community resources, addressing community needs, and setting goals and priorities. More information about the efforts that occurred is available upon request. To request additional information please contact:

Annual Review 2022

The Hancock County Transportation Coalition met on October 7, 2022 in-person at the HHWP Office, 1637 Tiffin Avenue, Findlay, Ohio to conduct the annual review of the Hancock County Coordinated Human Transportation Plan. The transportation plan was reviewed in its entirety; the coalition made no substantive changes to the plan. A public comment period was advertised in the newspaper and via social media to review the plan and on November 2, 2022 the coalition adopted the plan. The lead agency submitted the Hancock County Coordinated Human Transportation Plan annual review with updates to the Ohio Department of Transportation on December 29, 2022.

Annual Review 2023-2024

The Hancock County Transportation Advisory Committee met on May 15, 2024, in-person at the Family Center, 1800 N. Blanchard St., Findlay, OH 45840, to conduct the annual review of the Hancock County Coordinated Human Service Transportation Plan. The plan was reviewed; the coalition made no substantive changes to the plan. HHWP Community Action Commission received a grant from ODOT for a Transit Development Plan. The Transit Development Plan timeline is Fall 2023-Summer 2024. It is expected that the Transit Development Plan will help inform the future goals and strategies of the next iteration of this Coordinated Human Services Transportation Plan. The Hancock County Transportation Advisory Committee voted on May 15, 2024, to approve the plan. The lead agency submitted the annual review with updates to the Ohio Department of Transportation on May 30, 2024.

Annual Review 2024-2025

Thus far in 2025, The Hancock County Transportation Advisory Committee met on February 5 and April 9 in-person at the Family Center, 1800 N. Blanchard St., Findlay, OH 45840. At these meetings, the Transit Development Plan and its relation to the Coordinated Plan were discussed. The coalition made no substantive changes to the coordinated plan. It is expected that the Transit Development Plan will help inform the future goals and strategies of the next iteration of this Coordinated Human Services Transportation Plan. The Hancock County Transportation Advisory Committee voted via email in June 2025 to approve the plan. The lead agency submitted the annual review with updates to the Ohio Department of Transportation on June 30, 2025.

Appendix C: Definitions

There are several terms used throughout the plan that may be unique to transportation providers or human service agencies. The terms are defined here for reference.

Coordination – Collaborative efforts toward understanding and meeting the mobility needs in the most appropriate, cost effective, and responsive manner.

FAST Act – Congress established the funding for Federal Transit Administration programs through authorizing legislation that amends Chapter 53 of Title 49 of the U.S. Code. On December 4, 2015, President Obama signed the Fixing America’s Surface Transportation (FAST) Act, reauthorizing surface transportation programs through Fiscal Year 2021. (The Infrastructure Investment and Jobs Act replaced the FAST Act.)

Gaps in Service – A break in the continuity of available transportation resources such as a break between hours of operation or a break between two or more geographic areas.

Lead Agency – The organization responsible for facilitating outreach; composing a plan that meets the requirements of current Federal and State legislation; maintaining documentation from the planning process and making it available upon request; and leading stakeholders through annual reviews, amendments, and updates of the plan. The Lead Agency also is responsible for submitting the adopted Coordinated Plan and all amendments or updates to participating stakeholders and ODOT.

Planning Committee – The Planning Committee is composed of key community stakeholders. The Planning Committee members agree to actively participate in the planning process and act as the plan advisory and adopting entity.

Ridership – The total number of passengers who boarded transportation vehicles are counted each time they board a vehicle.

Section 5310 Program – Enhanced Mobility of Seniors & Individuals with Disabilities (49 U.S.C. 5310) provides Federal formula funding for the purpose of assisting private nonprofit groups in meeting the transportation needs of older adults and people with disabilities when the transportation service provided is unavailable, insufficient, or inappropriate to meeting these needs. The program aims to improve mobility for seniors and individuals with disabilities by removing barriers to transportation service and expanding transportation mobility options.

Section 5311 Program – The Formula Grants for Rural Areas program provides capital, planning, and operating assistance to states to support public transportation in rural areas with populations of less than 50,000 where many residents often rely on public transit to reach their destinations. The program also provides funding for state and national training and technical assistance through the Rural Transportation Assistance Program. Subrecipients may include state or local government authorities, nonprofit organizations, and operators of public transportation or intercity bus service.

Section 5307 Program – The Urbanized Area Formula Grants program (49 U.S.C. 5307) makes federal resources available to urbanized areas and to governors for transit capital and operating assistance in urbanized areas and for transportation-related planning. An urbanized area is an incorporated area with a population of 50,000 or more.

Transportation – Transportation is broadly defined to include traditional transit, human service agency services, on-demand (taxi-like) services, bicycle and pedestrian programs and amenities.

Unmet Transportation Needs – Transportation that is wanted or desired but is not currently available.
